

Abstract title for EAC2021 (not more than 200 characters including spaces)

J.L. First¹, P.L. Second² and J.C. Third²

¹Department of, University of Somewhere, City, Postcode, Country

²Department of, University of Elsewhere, City, Postcode, Country

Keywords: first, second, third, fourth, fifth.

Presenting author email: j.first@somewhere.edu

The abstract should be in a double-column format and only ONE page long. Use A4 page set-up and make all margins (top, bottom, left, right) 20 mm wide. Use 10 pt Calibri font (except for the title in 12 pt bold and sentence case). Centre the title, the authors' names, the addresses, and keywords and contact email address. Please compose a title that clearly and succinctly describes your content to maximise its impact.

Start each paragraph, except the first, with an indent. Justify the body of the text both left and right. Do not use page numbers. Uniformity of the abstract style makes the work easier to digest! Keywords are there to draw attention to your abstract and help the organisers allocate the presentation to the most appropriate session.

A good abstract might be structured as follows:

- One or two sentences to provide a basic introduction to the field.
- A few sentences of more detailed background followed by a statement of the general problem being addressed.
- A few sentences summarising the main result.
- A few sentences explaining what this result means, potentially contrasting with previous findings.
- A few sentences placing the result in a more general context and what the broader implications are.

Use clear English when writing your abstract, emphasising what is new and why it should attract the audience's attention.

Figures can be in colour or black and white. Ensure that Figures and Tables have a caption and that they are numbered consecutively.

Table 1. Comparison between theoretical predictions and experimental measurements.

Month	Measured density ($\mu\text{g}/\text{m}^3$)	Predicted density ($\mu\text{g}/\text{m}^3$)
Feb	0.4	0.4711
Jun	2.4	1.528×10^4

References should be made in the style (Dickenson, 2005), Marr and Morrissey (2010) or as Curtis *et al.* (1996). Examples of references are shown below.

Abstract review

The abstracts will be reviewed by the chairs and co-chairs of the EAA working groups. Abstracts which do not fulfil the standards will be rejected. Please avoid submitting abstracts containing only future results.

Accepted abstracts will be placed on the conference website/app and provided to conference attendees. Abstract titles and author lists will be listed in the conference handbook/app.

Participants should not make requests for oral presentation of several papers on similar subjects. We recommend submitting only the most general paper for an oral presentation and the others for a poster presentation.

The abstract should be submitted in **pdf format** through the EAC2021 website (abstract submission provided by ConfTool). The deadline for abstract submission is **31st of March 2021**.

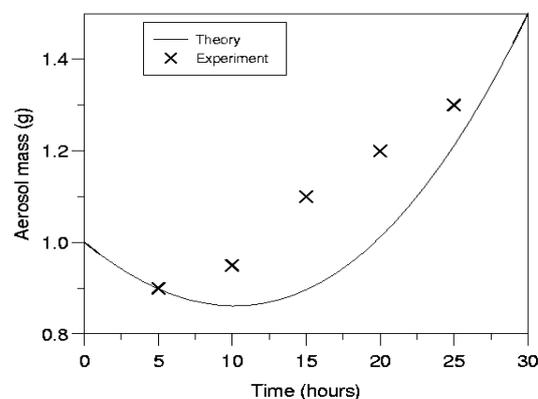

Figure 1. This plot is a comparison between theory and experimental data.

This work was supported by the National Council for Aerosol Research under grant JB/005.

References

Any references should be formatted consistently and included within the one-page abstract limit.
